

# Тема: “Разработка приложения “Учет аппаратного оборудования””

ВЫПОЛНИЛ СТУДЕНТ ГРУППЫ ИС-32 БОНДАРЕВ Д.С.

**Цель учебной практики** – разработка мобильного приложения для Android

**Объект исследования** – мобильные приложения

**Предмет исследования** – особенности реализации мобильного приложения для Android

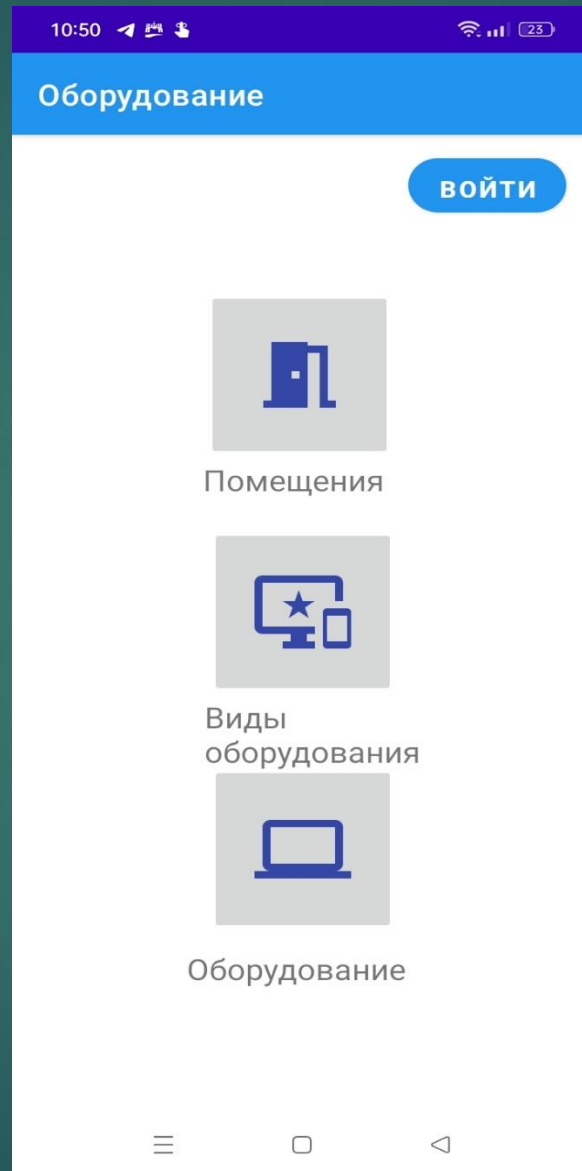

# Выбор инструментальных средств

# Окно авторизации

10:50

Оборудование

## Авторизация

Введите логин

Введите пароль

← ВОЙТИ

Navigation icons: menu, home, back

Detailed description: This is a mobile application interface for authorization. At the top, a purple status bar shows the time 10:50, signal strength, and battery level at 23%. Below this is a blue header with the text 'Оборудование' (Equipment). The main title 'Авторизация' (Authorization) is centered in a light blue box. The form consists of two input fields, each preceded by a key icon, labeled 'Введите логин' (Enter login) and 'Введите пароль' (Enter password). At the bottom of the form are two blue buttons: a circular button with a left arrow and a rounded rectangular button labeled 'ВОЙТИ' (Log In). The bottom of the screen features three standard Android navigation icons: a menu icon, a home icon, and a back icon.

```
fun Login(view: View) {
    val loginText: TextView = findViewById(R.id.editTextLogin)
    val passwordText: TextView = findViewById(R.id.editTextPassword)
    val signText: TextView = findViewById(R.id.textSign)
    val login = loginText.text.toString()
    val password = passwordText.text.toString().toInt()
    val intent: Intent = Intent(packageContext: this@LoginActivity, ProfileActivity::class.java)
    if (login.toString().equals("admin") && (password.toString().toInt().equals(123456))) {
        signText.setText("Вы успешно авторизировались!")
        intent.putExtra(name: "Login", login)
        intent.putExtra(name: "Password", password)
        startActivity(intent)
    } else {
        signText.setText("Логин или пароль неверны!")
    }
    if (login.toString().trim().length == 0) {
        signText.setText("Заполните поля!")
    }
}

fun BackMenu (view: View){
    val intent: Intent = Intent(packageContext: this@LoginActivity, MainActivity::class.java)
    startActivity(intent)
}
```
